Our Head Butt Hotel Nutritional Protocol

Here at the Head Butt Hotel, we take great pride, in the work we do, to restore the health of the pets who join our organization, not to mention the time and financial investment. Nothing could make us happier, than to find the perfect home, where each one can live out their natural lives, safe, healthy, and loved.

We utilize a Food as Medicine concept here and would like to summarize our three-part nutritional protocol:

The only kibble we allow our felines to be fed, is Cat Fancier's endorsed Young Again brand, affordably priced including free shipping direct to your home. This brand unlike all the others (including the prescription brands Royal Canin and Science Diet Hills commonly sold by veterinarians), is not only grain free, but does not include any other starch fillers, plants or vegetables, barley, potatoes, oats, rice, etc., which could affect the health of felines. We free feed the Cat Kitten Zero Carb formulation as our base, being many of the cats come to us with an overall history of poor nutrition, often resulting in diabetes, kidney disease, or other issues. We furnish our adopters with a sufficient supply of kibble to last, along with a coupon for 10% off the initial order for this wonderful brand of food. We utilize approximately 2 ½ lbs. per cat per month so many times, one bag will in fact last the average 10 lbs. cat up to three months. Please feel free to take advantage of our client code #189028 or by placing your order thru our website, as we greatly appreciate the referral donation Young Again extends our non-profit.

Additionally, we feed the Triumph brand pates (no byproducts) shipped direct thru Chewy. If you are not an already established Chewy client, we would greatly appreciate the referral donation if you would place your initial order their link on our Head Butt Hotel website. We supplement the wet pates with additional fluids for extra hydration, either a splash of Re-sorb electrolytes or filtered Zero Water.

For cats with Special medical conditions, we have added Hare Today as our specialized RAW resource, in addition to Publix for fresh ground pork, to accommodate the individual needs of several of the cats in our care. Ideally, in a perfect world, financially and man-power permitting, raw feeding would be the optimal choice for all carnivores, both dogs and cats. In the meantime, we continue to offer our residents their standard 8:00 pm ground raw feeding, a treat they all patiently await and indulge in.

Our Platinum water fountains are filled daily with cold filtered Zero water, and we use affordable and natural Pelletized Horse Bedding Pine (Tractor Supply) to avoid any chemicals often used in the more expensive brands of scented and light litters.

We are a flea free environment, although on the rare occasion when we may need to incorporate flea protection, we use Cheristin and Capstar. When necessary, we also utilize Drontal (de-worming hooks/rounds/tapes) and Profender.

After we transport your new family member to you, we would greatly appreciate if you could share a review for our organization, on our Great Non-Profits portal.

We can't thank you enough for your interest in our pets, and we look forward to knowing this lucky one will enjoy many years of love and realize the wonderful life every one of them deserves.

Christine, Larry and all the Head Butt Hotel Furry Friends!

Electrolyte Recipe Courtesy of J.C.Farris, Secrets of A Vet Tech

Re-sorb can be purchased at Tractor Supply or on Amazon.

Add 1 beef bouillon cube to one (1) cup of hot water. Mix until dissolved. Put contents in pitcher. Add enough warm water to make 2 quarts. Add entire contents (both sides of Re-sorb packet) and stir. Once cool, store in refrigerator. We add a splash of this to the Triumph Wet Pates for a bit of extra hydration, although the Zero Water also does the trick.
