Head Butt Hotel Nutritional & Care Protocols

Here at the Head Butt Hotel, we take great pride, in the work we do, to restore the health of the pets who join our organization, not to mention the time and financial investment. Nothing could make us happier, than to find the perfect home, where each one can live out their natural lives, safe, healthy, and loved.

Two of the most invaluable resources we recommend to help educate pet-owners, is the movie Pet-Fooled, and Susan Thixton's blog which she's dedicated her life to, the Truth About Pet Food.

We utilize a Food as Medicine concept here and would like to summarize our three-part nutritional protocol being most people, are not aware that cats are obligate carnivores or that their canine counterparts are omnivores.

The only kibble we allow our felines to be fed, is Young Again, affordably priced including free shipping direct to your home. This brand unlike all the others (including high carb prescription Royal Canin and Science Diet Hills commonly sold by veterinarians), is not only grain free but has only 0 to 6% digestible carbs. It does not contain any corn, wheat, soy, gluten, nor other carbohydrate starch fillers, plants or vegetables, barley, potatoes, oats, rice, peas, nor tapioca, etc., which will negatively impact and affect the health of felines. At the Head Butt Hotel, we feed the Mature formulation as our base for adults who have already reached their maximum adult growth, while the Cat/Kitten Original is for Mamas and kittens. The Mature formula is lower in phosphorus and was added to Tanya's Comprehensive Food

Guide to Feline Chronic Kidney Disorder last year. Both kidney disease and diabetes are two very avoidable health issues, caused by the 25 to 55% carbs included in all other brands of dry kibble cat food. Most cats who join us, arrive with an overall history of poor nutrition, many with health issues, caused by the inflammatory genetically modified ingredients treated with pesticides, in the pet food they were previously being fed. The average 10 lbs. cat will consume approximately 2 ½ lbs. of Young Again per month so one 8 lb. bag will in fact last well over two months, an affordable option. Please feel free to take advantage of our client code #189028 or by placing your order thru our website, as we greatly appreciate the small referral donation Young Again extends to our non-profit.

We offer freeze dried and no byproducts pate wet food options, and offer fish very sparingly, given the negative impact mercury has on feline renal health. We have Chewy and Amazon Smile Wish Lists and follow and are incorporating recommendations by Dr. Judy Morgan's Naturally Healthy Pets, and Pam Roussell at Purrrfectly Holistic.

We also feed raw, which would be the optimal choice for all carnivores in our care time and man-power permitting, a complete human grade regimen. Publix will happily grind large cuts of meat, which can be frozen while Hare Today offers a full range of specialty products as well as My Pet Carnivore Organic bone broth, farm fresh eggs, and roast chicken are also a huge hit here.

Our Platinum water fountains are filled daily with cold filtered Zero water, and we use affordable and natural Pelletized Horse Bedding Pine (Tractor Supply) to avoid any chemicals used in the more expensive brands of scented and light litters. Aside from the water fountains, at the advice of our homeopath, we've eliminated all metal water bowls and added Glass Pyrex bowls instead.

We strive to maintain a flea free environment, and are revising our protocols to eliminate the use of chemical laden pesticides (Cheristin, Capstar, Profender, Advantage Multi, Flea Assassin, and Puppybutts.net generic Tapex Plus products) to safer alternative chemical free and healthier options.

Amber Collars: <https://natural-baltic-amber.com/amber-pet-collars/>

Bio Power Pet: <https://biopowerpet.com/>

Anibio Tic.clip available thru Fluffy Dog Wellness: <https://www.fluffydog.net/products/tic-clip>

Wondercide: <https://www.wondercide.com>

Two Crazy Cat Ladies: <https://twocrazycatladies.com>

Do It Yourself At Home Remedies: <https://www.treehugger.com/natural-flea-remedies-cats-and-dogs-4864286>

For environmental home products, we recommend the BudMD Termination Stations available thru Amazon Smile.

In addition to these alternatives, we urge everyone to follow Dr. Judy Morgan's Healthy Natural Pets on Facebook and Instagram and subscribe to her email distribution. She's an instrumental source of education for pet owners to learn about on safe alternatives to every pharmaceutical product on the market, identifying their detrimental effects. There are many toxic free alternatives to pharmaceuticals, natural and safe, containing no synthetic toxins, available on her website, as well as home remedies that pet owners can prepare themselves.

After your new family member arrives, we would greatly appreciate everyone sharing a review for our organization, on our Great Non-Profits portal.

We cannot thank you enough for your interest in our pets, and we look forward to knowing another lucky pet will enjoy many years of love and will live out their healthy natural lives that every one of them deserves.

From all of your friends at the Head Butt Hotel!
